GOAL – IDENTIFY OPPORTUNITIES

TO IMPROVE CUSTOMER TRUST

MEESHO 'S OVERVIEW

Meesho is a e-commerce marketplace that connects millions of small businesses with value-conscious shoppers across India.

WHAT PROBLEM IT SOLVES ?

- Offers affordable products across multiple categories.
- Enables millions of MSMEs and local sellers to sell online with minimal barriers.
- Provides integrated logistics, payments, and doorstep delivery, making e-commerce accessible across India.

KEY COMPETITORS !

Flipkart

amazon

shopsy

Myntra

BUSINESS MODEL

Meesho operates a B2C, asset-light marketplace that connects millions of sellers with value-conscious shoppers across India. Instead of owning inventory, it enables third-party sellers to list and sell products while Meesho manages technology, payments, logistics, and customer support.

VALUE FOR CUSTOMER

- Affordable products across multiple categories
- Wide product selection
- Doorstep delivery & multiple payment options

VALUE FOR SELLERS

- 0% commission on product sales
- Nationwide customer reach
- Integrated logistics and seller tools

HOW MEESHO MAKES MONEY

Unlike Amazon and Flipkart, Meesho follows a zero-commission model for sellers. Instead, it earns revenue through:

- Logistics & Fulfilment Services (largest revenue stream)
- Seller Advertising
- Seller Services & Business Tools

USER PERSONA

28-year-old homemaker from a Tier-2 city who wants to buy affordable products online for her family but is concerned about product quality and delivery reliability.

24-year-old college student who shops online for fashion and accessories while looking for the best deals within a limited budget.

RATINGS & REVIEWS

Based on Play Store customer reviews, the most common complaints are:

- Received Product different from what was ordered.
- Delayed or failed deliveries.
- Slow and frustrating return process.
- Poor customer support.
- Unexpected price changes during checkout.
- COD not available.
- Delivery partner reliability issues.

Earlier, **Cash on Delivery was available**, and my orders were delivered without any problems. Now, COD is unavailable for many products, making it difficult to place orders. I also noticed that some products show one price while browsing, but the price increases after adding them to the cart. Additionally, when I pay online because COD is unavailable, some orders are not delivered. Please improve price transparency, restore COD wherever possible, and ensure reliable delivery for prepaid orders.

Delivery partners cause a lot of trouble. You cannot ask for a worse shopping app than this. **They show you the cheapest price of a product** and once ordered, they don't ship it for 7-8 days and cancel the order automatically. The only customer support they got is an incompetent AI which only has pre-loaded set of 3-4 answers which keep on repeating. Go for this app if you want to debit money from your account and then received back as refund after 10 days. Other than this, this app is of no use.

I always got **nice product** but few days ago I ordered I customized wallet after payment is done then I sent details on WhatsApp and then that guy was asking for money to write name, Why I will pay a single rupee to anyone outside the meesho, it's a request add your charges too in the product, it may lead to any fraudulent activity.

✗ Total Waste of Time and Money – Do Not Buy! I am extremely disappointed with my recent purchase from Meesho. The entire experience has been a total nightmare from start to finish. Third-Class Product: The quality of the item is incredibly cheap and looks nothing like the pictures shown. It feels like a total rip-off.. Bad Service & Response: Their customer support is completely useless. When I tried to raise an issue about the defective product, I received a third-c

I've ordered **many products from Meesho, and most of them were good**. But my recent experience was really disappointing. I ordered a sipper glass for my sister's birthday, and it arrived broken. The exchange took 18 days, and after waiting so long, I received the same damaged product again. Why, Meesho? 😡 The delivery person was also very rude. Delivery is always delayed, and orders stay in shipping for 3-4 days. Please improve your quality checks, exchange service, and delivery speed

The item I received looks absolutely nothing like the picture shown on the app. It is a completely different product. To make matters worse, when I initiated an exchange hoping to get the correct item, **they literally sent the exact same wrong product again!** Complete waste of time and energy. Please avoid buying this product. Extremely poor service from the seller.

PRIORITIZED PROBLEM

Customers lose trust in Meesho due to inconsistent post-purchase experiences, particularly when they receive incorrect products and face difficulties during returns or exchanges.

WHY THIS PROBLEM?

- Most frequently mentioned issue in customer reviews.
- Directly impacts customer trust and satisfaction.
- Leads to higher returns, refunds, and lower repeat purchases.

BUSINESS IMPACT

- Reduced customer retention
- Increased return & exchange costs
- Lower customer trust and loyalty

“ Trust is the foundation of e-commerce. Even with affordable pricing, repeated fulfillment failures discourage customers from making future purchases. ”

ROOT CAUSE ANALYSIS (RCA)

Customers receive wrong or poor-quality products, leading to a loss of trust in Meesho.

POSSIBLE ROOT CAUSE	EVIDENCE/REASONING
Limited seller operational maturity	Many Meesho sellers are MSMEs with limited inventory management, quality control, and order verification processes, increasing the risk of fulfillment errors.
Misleading product listings	Some sellers use attractive product images but ship lower-quality or different products, creating a mismatch between customer expectations and reality.
Weak fulfillment & quality checks	Marketplace fulfillment has limited verification before dispatch, allowing incorrect or low-quality products to reach customers.
Insufficient seller accountability	Poor-performing sellers may continue selling despite repeated customer complaints, reducing trust in the marketplace.

EXISTED SOLUTION (M-TRUSTED)

WHAT IT DOES?

- Identifies trusted sellers
- Based on seller performance
- Improves buyer confidence

LIMITATIONS

- Seller-level badge only
- Doesn't evaluate individual products
- No mandatory real product verification
- Low-rated products can remain active

"M-Trusted builds trust in sellers, but customers buy products—not sellers. Product-level trust is still missing."

PROPOSED SOLUTION

FEATURE 1: MANDATORY PRODUCT VERIFICATION

Make it mandatory for sellers to upload:

- Real product images
- Short product video

Products that pass verification receive a Verified Product badge.

FEATURE 2: PRODUCT QUALITY MONITORING

Continuously monitor seller performance based on:

- Average Product Rating
- Return & Exchange Rate
- Product Mismatch Complaints
- Customer Feedback

RATING	ACTION
★ 4.0+	Healthy Product
★ 3.6–	Under Monitoring
★ 3.9	Seller receives Quality Improvement Notice
🔄 3.6 Repeated low ratings	Listing temporarily suspended until quality improves

SUCCESS METRICS

PRIMARY METRIC

Customer Trust Score (CSAT / NPS)

Target:  Increase by 15% within 6 months

SUPPORTING METRICS

METRIC	CURRENT PROBLEM	SUCCESS TARGET
Product Mismatch Complaints	High	↓ 30%
Return & Exchange Rate	High	↓ 20%
Average Product Rating	Low-rated products	↑ to 4.2+
Verified Product Adoption	New feature	80% of active sellers
Repeat Purchase Rate	Low customer trust	↑ 10%

BUSINESS IMPACT

- Lower return & refund costs
- Higher customer trust & Increased repeat purchases
- Improved seller quality across the marketplace

THANK YOU

meesho
